

THIS IS NOT BILL

EXPLANATION OF BENEFITS

AMOUNT BILLED

The amount is the original bill amount charged by medical providers, which the insurance company or customer needs to pay to the medical provider nominally.

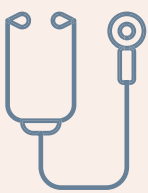

DISCOUNT/ADJUSTMENT

According to the contract between the insurance company and the medical provider, the provider needs to give a corresponding discount, so they can only charge the discount amount under the contract to patient.

INSURANCE PAID

This is the amount that the insurance company needs to pay according to the insurance plan with the patients and the contract signed with the medical providers.

PATIENTS PAID

This is the amount that the patient has already paid when the customer visited the doctor.

Patients no longer need to pay by the bill.

PATIENTS RESPONSIBILITY

According to the insurance plan, this is the remaining charge that the Patient needs to pay in addition to the discount of the insurance, the amount paid by the insurance company, and the amount that the customer has already paid. This cost will match the cost on the medical bill received by the patient.

THE GUIDELINES ARE FOR REFERENCE ONLY, AND THE SPECIFIC DETAILS MAY VARY ACCORDING TO DIFFERENT INSURANCE COMPANIES AND MEDICAL PROVIDERS.
