## Supplemental Life Insurance for Retirement Income Planning

## Permanent Life Insurance

First and foremost life insurance is a means of protecting your loved ones. However, in addition to a Death Benefit, permanent life insurance also accumulates cash value which can be used as a living benefit to provide income.

## Life Insurance as a Living Benefit - Retirement Income Planning ${ }^{1}$

If you are like most people you are probably concerned about whether or not you will have adequate income in retirement. Permanent life insurance can be a way of providing a supplemental income during your retirement years, and in the meantime provide financial protection to your family or business in the event of your death.

#### Abstract

${ }^{1}$ This material includes a discussion of one or more tax-related topics. This tax-related discussion was prepared to assist in the promotion or marketing of the transactions or matters addressed in this material. The tax-related discussion is not intended (and cannot be used by any taxpayer) for the purpose of avoiding any IRS penalties which may be imposed upon the taxpayer. Taxpayers should always seek and rely on the advice of their own independent tax professionals. New York Life Insurance Company, its affiliates and subsidiaries, and Agents and employees may not provide legal or tax advice. ${ }^{2}$ When taking a withdrawal (surrender), you are surrendering any available Paid-Up Additional Insurance for its Cash Surrender Value. This means your policy's Cash Value, available Cash Surrender Value, and Death Benefit will be reduced by the amount of the withdrawal. Unlike a policy loan, bank loan, or bank account withdrawal, once funds have been withdrawn, they cannot be repaid into the policy.

## Supplemental Life Insurance for Retirement Income Planning (cont.)

## What this can mean for you*.

Cumulative premium through age 64:
\$81,811

Gross retirement income from loans and surrenders:
$\$ 38,965$ for 20 years

Total cumulative after tax retirement income:
\$779,300
(\$38,965 for 20 years)

Remaining death benefit after loans and surrenders**:
\$943,848

Think about it. If you've already made smart decisions like saving and investing, consider how your permanent life insurance can potentially supplement your future retirement income and may give you more control over your future. If you're ready to get started, we are too.

> *These values are based upon the information and assumptions contained in the Supplemental Life Insurance for Retirement Income Planning Input Summary and Illustration.
> **This is the net amount of death benefit that is still remaining after receiving the retirement income from the policy.

## Key things to consider.

- Your policy's death benefit is generally paid to your beneficiary income tax-free.
- The cash value accumulation in your permanent life insurance policy grows taxdeferred.
- You generally have tax-free access to your policy cash value, and can use withdrawals* and policy loans to supplement your retirement income^.
*When taking a withdrawal (surrender), you are surrendering any available Paid-Up Additional Insurance for its Cash Surrender Value. This means your policy's Cash Value, available Cash Surrender Value, and Death Benefit will be reduced by the amount of the withdrawal. Unlike a policy loan, bank loan, or bank account withdrawal, once funds have been withdrawn, they cannot be repaid into the policy.
${ }^{\wedge}$ See Important Notes and Disclosures page for important tax assumptions and considerations.

# Supplemental Life Insurance for Retirement Income Planning (cont.) 

## Important Notes and Disclosures

- This material includes a discussion of one or more tax-related topics. This tax related discussion was prepared to assist in the promotion or marketing of the transactions or matters addressed in this material. The taxrelated discussion is not intended (and cannot be used by any taxpayer) for the purpose of avoiding any IRS penalties which may be imposed upon the taxpayer. Taxpayers should always seek and rely on the advice of their own independent tax professionals. New York Life Insurance Company, its affiliates and subsidiaries, and Agents and employees may not provide legal or tax advice.
- When too much premium is contributed to a life insurance policy, a policy may be characterized as a MEC under applicable federal tax rules. Under these rules, loans and withdrawals from a MEC are taxed to the extent of any gain in the policy. In addition, a 10 percent penalty tax may apply if you are under age 59 and $1 / 2$. For this reason, if you anticipate using your policy to provide an income stream in the future, you should ensure that your payment of premiums and any other transactions with respect to your policy do not cause your policy to become a MEC. Talk to your tax advisor for further details.
- If a policy is not a Modified Endowment Contract (MEC), then loans generally are not taxable and a withdrawal from the policy generally is taxable only to the extent that it exceeds the total investment in the policy. However, certain withdrawals made within the first 15 years after a policy is issued may be fully or partially taxable. If a policy is a MEC, then withdrawals and loans are taxable to the extent of the gain in the policy and, if the policyowner is under age $591 / 2$, may also be subject to a $10 \%$ penalty tax. Taxable distributions from a policy would be taxed as ordinary income.
- You can access the cash value in your policy via withdrawals and policy loans which reduce the policy's cash value and death benefit. Loans also accrue interest.
- Assuming your policy is not a MEC, once the distributions you've received from withdrawals equal your policy's cost basis, further income can be generated by taking loans against the policy's remaining cash value. Interest will be at current rates and added to the amount of the loan if not paid. Taking loans may provide for a federal income tax-free income stream but will reduce the death benefit and cash value of the policy. Since these policy values include non-guaranteed elements, the income stream funded by these policy values is not guaranteed. Any outstanding loans (including interest) on a policy that has lapsed or is surrendered prior to death will be considered income to the extent of gain in your policy and will be taxable to you. This is an important consideration in deciding whether to take policy loans. Talk to your tax advisor.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.
Prepared for AGE 2 BOY (Male, 2, Juvenile), AD117

# Supplemental Life Insurance for Retirement Income Planning Input Summary 

## RETIREMENT INFORMATION

Retirement Age: 65
Pre-Retirement Tax Rate: 28.00\%
Post-Retirement Tax Rate: 28.00\%

## WITHDRAWAL INFORMATION*

Cash Value of Withdrawal: Calculated
Withdrawal Mode: Annual
Age at First Withdrawal: 65

## POLICY LOAN INFORMATION*

## Loan Amount: Calculated

Loan Withdrawal Mode: Annual
Loan Interest Rate: 5.00\% until the policy anniversary on which the insured reaches age 100, 4.00\% thereafter Loan Interest Option: Accrue Interest

Age at First Loan: 67
*When taking a withdrawal (surrender), you are surrendering any available Paid-Up Additional Insurance for its Cash Surrender Value. This means your policy's Cash Value, available Cash Surrender Value, and Death Benefit will be reduced by the amount of the withdrawal. Unlike a policy loan, bank loan, or bank account withdrawal, once funds have been withdrawn, they cannot be repaid into the policy. Refer to the "Access to Policy Values" section of the Narrative Summary page for more information, and to the "Supplemental Illustration of Cash Flows" page for illustrative details.

## KEY TERMS

Please refer to the Narrative Summary for general information and key terms. Additional Column definitions unique to the Supplemental Life Insurance for Retirement Income Planning ledger:

Surrenders and Loans for Income: The sum of any amount resulting from the surrender of paid up additional insurance from the policy plus any amount loaned from the policy to provide retirement income.

Income Tax Payable: The federal income tax payable, if applicable, on the amount withdrawn or loaned each year, assuming an initial post-retirement federal income tax rate of $28.00 \%$. This is based on tax rate assumptions you have provided. At the time of your distributions, your individual circumstances may vary from these assumptions. Please talk to your tax advisor for further details and analysis.

After Tax Retirement Income: The net amount available after tax, of any withdrawal or loan, to provide retirement income.

## Supplemental Life Insurance for Retirement Income Planning Input Summary (cont.)

Cumulative After Tax Retirement Income: The sum of the current year's After Tax Retirement Income amount, plus all prior year's After Tax Retirement Income amounts.

# Supplemental Life Insurance for Retirement Income Planning Supplemental Illustration 

Base Policy Face Amount: $\$ 500,000$
Initial Death Benefit Amount: $\$ 500,000$
Premium Paying Period: 20 years

Premium Mode: Check-O-Matic Dividend Option: Paid Up Additions

## Supplemental Life Insurance for Retirement Income Planning Supplemental Illustration (cont.)

## End Notes

This illustration depicts the use of a New York Life Custom Whole Life insurance policy's Cash Surrender Value as a source of Supplemental Income for Retirement purposes. The Cash Surrender Value can be accessed either through surrenders of paid-up insurance or policy loans. The Death Benefit will be reduced by surrenders taken or loans not repaid.
Please refer to the "Owner Actions Reflected In This Illustration" page for an explanation of the Modified Endowment Contract status of the policy being illustrated.
\& Represents the insured's life expectancy added to the insured's age. See Additional Information section on the Narrative Summary page for more information.
Unless noted above, values shown are based on our current illustrative dividend scale and our current OPP expense charge of $12.00 \%$

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. # Illustration Input Summary (cont.) 

## WITHDRAWAL INFORMATION*

Cash Value of Withdrawal: Calculated Withdrawal Mode: Annual Age at First Withdrawal: 65

## POLICY LOAN INFORMATION*

Loan Amount: Calculated Loan Withdrawal Mode: Annual Loan Interest Rate: $5.00 \%$ until the policy anniversary on which the insured reaches age 100, 4.00\% thereafter Loan Interest Option: Accrue Interest Age at First Loan: 67
*When taking a withdrawal (surrender), you are surrendering any available Paid-Up Additional Insurance for its Cash Surrender Value. This means your policy's Cash Value, available Cash Surrender Value, and Death Benefit will be reduced by the amount of the withdrawal. Unlike a policy loan, bank loan, or bank account withdrawal, once funds have been withdrawn, they cannot be repaid into the policy. Refer to the "Access to Policy Values" section of the Narrative Summary page for more information, and to the "Supplemental Illustration of Cash Flows" page for illustrative details.

[^1]About Your Illustration<br>This illustration explains the important features of New York Life's Custom Whole Life insurance policy. This illustration can help you understand how this policy works and how it can fit into your plans. It reflects the information shown in the Illustration Input Summary.

This illustration may summarize some of the terms and conditions in your policy, but it is not part of your contract. The terms and conditions are as stated in your policy.

## Understanding Your Illustration

The following illustration provides a summary and year by year figures for Required Premiums, cash values and death benefits about the Individual Custom Whole Life policy you have chosen. This is a participating policy that is eligible to receive dividends. Many of the values contained in this illustration depend on the level of dividends we pay. As you read through your illustration, it is important for you to keep in mind that dividends are not guaranteed, and the actual dividends your policy receives may be higher or lower than those illustrated here. Your illustration consists of a basic illustration, and may contain one or more supplemental illustrations as well.

## Basic Illustration

The basic illustration consists of this Narrative Summary, an Illustration Summary page, and a Yearly Detail page.

The Illustration Summary page that follows provides an overview of the policy's Yearly Guaranteed Premium, the anticipated Premium Outlay, cash value and death benefit. These values show how your policy would perform based on the following: 1) the guaranteed policy values, i.e., zero dividends, 2 ) our currently illustrated dividends, and 3) a scenario assuming $50 \%$ of our currently illustrated dividends.

The Yearly Detail page shows guaranteed and non-guaranteed current death benefit and cash values in all policy years.

## Supplemental Illustrations

Your illustration also includes one or more supplemental illustrations which will show your policy's values using only the Company's currently illustrated dividends unless otherwise stated. These supplemental pages are intended to illustrate your policy's performance if you elect to use its optional features, such as adding or dropping a rider, exercising a rider in the future, or accessing your living benefits via policy loans or surrenders.

## How The Policy Works

This Custom Whole Life Insurance policy provides a death benefit that is guaranteed for as long as the policy remains in force. The premium amount you pay for the base Custom Whole Life Insurance policy is also guaranteed. It will not increase as long as the policy remains in force. In addition, this policy builds guaranteed cash value and is eligible to receive dividends as described in the Key Terms and Column Heading Definitions section.

The Narrative Summary contains definitions of key terms as well as an explanation of your policy's features and benefits.

## Key Terms and Column Heading Definitions

## Age

This is the insurance age, as defined in your policy, of the insured at the end of the policy year.

## Annual Cash Surrender Value Increase

The year-over-year growth in your policy's Cash Surrender Value, after cash flows into and out of the policy have been taken into consideration.

## Annual Policy Cash Flow

The illustrated net out-of-pocket cost each policy year. It reflects the out-ofpocket cash payment of the premium and the repayment of any loan and/or loan interest in cash, less

- cash received from policy loans and/or surrenders
- dividends received as cash
- dividends or surrenders used to reduce premiums

## Annual Tax \& Penalty

The amount of projected tax and penalty incurred each year based on the policy's cash flows and your illustrated tax bracket.

## Cash Surrender Value

This is the amount we will pay if the policy is surrendered prior to the insured's death. It reflects guaranteed cash value, plus the cash value of paid up additional insurance, plus dividend accumulations, minus any loans and/or surrenders taken. This figure is shown as of the end of the policy year after the full value for that year has been reached and any Dividend has been credited to the policy.

Unpaid loan interest will be added to the policy's outstanding loan balance and will further reduce the policy's Cash Surrender Value. If the total loan balance exceeds the Cash Surrender Value, your policy

[^2]
## Narrative Summary (cont.)

may lapse unless additional payments are made. Surrendering the policy or allowing it to lapse at that time may result in taxable ordinary income being reported to the policyowner and the IRS. If large loans are taken, there may not be sufficient Cash Surrender Value to cover the potential tax payable to the IRS.

## Cash Surrender Value of PUAs

The Cash Surrender Value of any accumulated Paid-Up Additional Insurance purchased by Dividends or payments you make into the Option to Purchase Paid-Up Additions (OPP) rider, at the end of the given year.

## Cumulative IRR on Cash Surrender Value

The rate of return that your policy's Annual Cash Flows up to a specific point in time would have to earn every year in order to arrive at the Cash Surrender Value at the end of a particular Year. The Cumulative IRR calculation includes nonguaranteed dividends, but ignores taxes.

## Cumulative IRR on Death Benefit

The rate of return that your policy's Annual Cash Flows up to a specific point in time would have to earn every year in order to arrive at the Death Benefit at the end of a particular Year. The Cumulative IRR calculation includes non-guaranteed dividends, but ignores taxes.

## Cumulative Outstanding Loan

The illustrated total of the unpaid principal of any policy loans taken over the life of the policy. Any loan interest unpaid as of a policy anniversary becomes part of the loan principal and is reflected in the next policy year.

## Cumulative Policy Cash Flow

The total of all illustrated annual policy cash flows up to the year specified.

## Death Benefit (BOY)

This is the amount we will pay to the beneficiary if the policy is in force when the insured dies. The Death Benefit may differ from the Face Amount for a number of reasons such as:

- coverage from riders
- accumulated dividends
- outstanding policy loans

The Death Benefit is shown as of the beginning of the Year (BOY) before any Dividend is credited to the policy.

## Dividends

Dividends are a return of that portion of the premium that is not needed to pay current expenses, death claims and future benefits. You may choose from several different Dividend options as described below.

## Paid-Up Additions

This option uses your Dividends to purchase paid-up additional insurance. Once Dividends have been declared and "credited" to your policy, they become a permanent part of the policy. Paid-Up Additional insurance increases both the guaranteed Death Benefit and the guaranteed Cash Surrender Value of the policy.

Dividend Accumulations
This option leaves your Dividends with us to accumulate at interest. Once Dividends have been declared and "credited" to your policy, they become a permanent part of the policy. The accumulated value may be withdrawn or borrowed against. Any remaining accumulated value will be paid to the beneficiaries, in addition to the total Death Benefit.

## Cash

This option pays out your Dividends to you in cash.

## Reduce Premium

This option applies your Dividends toward the payment of the premium. Any part not needed to pay the premium is paid to you in cash.

This illustration assumes the dividend option is Paid-Up Additions.

Dividends are not guaranteed. Dividends have fluctuated significantly in the past, and fluctuations in future years are likely. These fluctuations occur mainly because of changes in interest rates on fixed income investments we purchase to back our policies. These fluctuations can affect our investments in the same way your own income might be affected by increases or reductions in the interest rates on your savings. While dividends may not go up or down as rapidly as current interest rates, trends in interest rates will generally push dividends in the same direction over time. Dividends may also be affected by the performance of other types of investments we purchase, our expenses (including the taxes we pay), and our mortality experience (i.e., the Death Benefits we pay and how soon those deaths occur after policies are issued).

The accompanying illustration shows the continuation of our currently illustrated dividend scale and how it would impact policy values. It is not a guarantee of future performance. However because dividends fluctuate, results in future years may be more or less favorable. When purchasing a policy, you should consider the Company's reputation for financial strength and investment management.

## Face Amount

The illustrated Face Amount is the dollar amount of life insurance under the base policy as selected by the policyowner at the time of issue.

[^3]
## Narrative Summary (cont.)

## Net Annual Policy Loan

The policy loan amount taken each year, plus any accrued loan interest, minus any loan repayment.

## Net Annual Surrender

The Cash Surrender Value of paid-up additions that you are illustrated to receive in a given year, minus any premiums due that year.

## Premium Outlay

This is the out-of-pocket payment that we anticipate will be necessary to keep the policy in force. If the illustration assumes that policy loans, Dividends or policy values are used to pay some or all of the required premium, the numbers shown in this column will be lower than the required premium for that scenario.

## Year

This refers to the policy year.

## Year by Year IRR on Cash Surrender Value

The annual rate of return that the Annual Cash Flow for a given Year plus the Cash Surrender Value at the end of the previous Year would have to earn in order to arrive at the policy's Cash Surrender Value at the end of the given Year. The Year by Year IRR calculation includes non-guaranteed dividends, but ignores taxes.

## Yearly Guaranteed Premium

This is the Guaranteed Maximum amount that must be paid to keep your insurance in force as illustrated. It is the contract premium, and is the sum of the guaranteed premium of the Custom Whole Life policy and the maximum guaranteed premium for any rider. This premium can be paid in cash, by using the policy's Dividends if sufficient, or by borrowing from the policy.

## Access to Policy Values

## Loans and Loan Interest

You can borrow up to the maximum loan value of this policy by taking a loan, generally on a tax-free basis. This Custom Whole Life policy features a variable loan interest rate that may increase or decrease over time. New York Life sets the loan interest rate quarterly. Loans reduce the available cash surrender value and total death benefit of the policy by the amount of the outstanding loan and accrued loan interest.

Taking a policy loan could result in an unexpected taxable event. Unpaid loan interest will be added to the policy's outstanding loan balance. If the total Ioan balance exceeds the policy's Cash Surrender Value, the policy may lapse if the loan is not repaid. Under these circumstances, surrendering the policy, or allowing it to lapse at that time, may result in taxable ordinary income being reported to the policyowner and the IRS. You should also note that if you take a large loan, your policy may not have sufficient cash value to cover the potential tax due to the IRS. You may wish to consult your tax advisor prior to taking a loan under this policy.

## Withdrawals

You can elect to surrender paid-up additional insurance, purchased by dividends and/or the OPP Rider, for its cash value. These surrenders of paid-up additional insurance reduce the available cash surrender value and total death benefit of the policy.

If a policy is not a MEC, distributions resulting from the surrender of paid-up additional insurance are generally taxable only to the extent that it exceeds the total premiums paid into the policy. In certain circumstances, these surrenders may cause your policy to become a MEC. Please consult your tax adviser with any questions about tax implications of surrenders of paid-up additional insurance from your policy.

## Periodic Payments

After your Custom Whole Life policy is paid up, you can elect to receive regularly scheduled distributions from your policy's cash value by arranging periodic payments. These periodic payments can be funded by your choice of three periodic payment options: (1) by the cash value resulting from the surrenders of paid-up additional insurance purchased by dividends and/or the OPP Rider. The amount that can be paid to you is generally limited to the amount of premiums paid (this amount is the "Tax Basis"); (2) by a policy loan from the policy's Cash Surrender Value; or (3) a combination of both. PERIODIC
PAYMENTS FUNDED BY ANY OPTION REDUCE YOUR POLICY'S CASH SURRENDER VALUE AND DEATH BENEFIT.

If you choose to elect a periodic payment option once all premiums have been paid on the policy, you will be provided with an inforce supplemental illustration depicting the impact of the periodic payment option you have chosen, based on the nonguaranteed elements and assumptions in effect at that time. DUE TO THE NONGUARANTEED NATURE OF THE POLICY VALUES FUNDING THE PAYMENTS, THE

[^4]
# Narrative Summary (cont.) 

## PERIODIC PAYMENTS YOU ELECT ARE NOT GUARANTEED TO CONTINUE IN THE AMOUNT OR DURATION THAT YOU HAVE CHOSEN AFTER THEY HAVE BEGUN. You <br> should request inforce illustrations from your agent from time to time to review your period payment elections and ensure the sustainability of your policy.

PLEASE NOTE: If your policy is a Modified Endowment Contract, any surrenders or withdrawals from your policy or policy loans may have adverse tax consequences. You should consult with your tax advisor. Refer to the "Modified Endowment Contract (MEC)" section of the Narrative Summary for more details.

## Riders and Benefits

## Riders and benefits can

 enhance your policy. However, they may be subject to jurisdictional availability.
## These riders are automatically

 included in your policy.
## Insurance Exchange Rider

With this rider you have the ability to exchange your policy for a new Custom Whole Life policy or Whole Life policy or Whole Life 121 policy that can be issued on a new insured, using values from your original policy. This rider provides for the one-time exchange to a new policy on a successor insured, subject to evidence of good health and insurable interest. A one-time payment may be required upon exercise, depending upon the cash value of the existing and new policies at the time of exchange. Note, this rider is only available on nonqualified policies, and there may be adverse tax consequences associated with exercising this rider.

## Spouse's Paid-Up Insurance Purchase Option Rider

This rider allows a spouse who is named as a policy's beneficiary to purchase a new paid-up Whole Life insurance policy on his or her own life without evidence of insurability after the insured has died. This rider is automatically added at time of issue and is subject to state availability. The new paid-up policy will be issued without evidence of insurability. Depending on the insured's health, premiums may be lower for a fully underwritten policy.

Subject to availability, this rider can be added to your policy at any time.

## Living Benefits Rider

This rider allows a portion of the policy's eligible death benefit to be accessed should the insured be diagnosed with a terminal illness with a severely shortened life expectancy. There is a cost to exercise this rider

## Additional Information

## Federal Tax Treatment After Age 100

The federal tax treatment of your policy after the Insured's Attained Age 100 is uncertain and your policy may be subject to adverse tax consequences. Please consult your tax advisor before choosing to continue your policy after age 100.

## Age 121 Policy Anniversary

When the insured reaches age 121, the policy will mature. Any policy loan outstanding at age 121 will continue to accrue interest at the current policy loan
interest rate. All insurance or benefits from riders will end. The policy will remain eligible for dividends and can be surrendered at any time for its cash value. If the benefit were paid out, any outstanding loan would reduce the amount of the payment.

## Life Expectancy

For the purpose of this illustration, life expectancy is the average projected lifespan of a representative group of people of the same sex, issue age, and underwriting class. The insured's age at life expectancy is noted on the Illustration Summary page.

## Modified Endowment Contract (MEC)

Certain tax advantages are no longer applicable to a life insurance policy if too much money is put into the policy during its first seven years, or during the seven year period after a "material change" to the policy. If the cumulative premiums paid during the applicable 7-year period at any time exceed the limits imposed under the Internal Revenue Code the policy becomes a "Modified Endowment Contract" or MEC. A MEC is still a life insurance policy, and death benefits continue to be tax free, but any time you take a withdrawal from a MEC (including a policy loan), the withdrawal is treated as taxable income to the extent there is gain in the policy. In addition, if you are under $591 / 2$, a penalty tax of $10 \%$ could be assessed on those amounts and upon surrender of the policy.

## Premium Payments

This illustration assumes that all premiums are paid when due.

[^5]
## Narrative Summary (cont.)

This illustration is not to be relied upon for tax advice. Please consult your tax and legal advisers if you have questions about
taxes. The tax status of the policy as it applies to the policyowner should be reviewed annually.

## Illustration Summary

Base Policy Face Amount: \$500,000
Initial Death Benefit Amount: \$500,000
Premium Paying Period: 20 years

## Guaranteed

These policy values and benefits are guaranteed based on the Annual Policy Cash Flow shown in this example and the maximum guaranteed OPP expense charges

## Non-Guaranteed Midpoint

Policy values and benefits are based on $50 \%$ of the Company's currently illustrated dividend scale and on an OPP expense
charge which is the average of the current and maximum guaranteed levels.

## Non-Guaranteed Current

Dividends and the OPP expense charge are non-guaranteed elements and are subject to change by the Company.
Because these policy values and benefits are based on the current non-guaranteed OPP expense charge and include values increased by Dividends, which are not
guaranteed, the policy values and benefits shown in this column are not guaranteed. This illustration shows the continuation of the current expense charge and currently illustrated dividend scale; the Dividends actually paid and expense charge imposed may be more or less favorable than those shown here.

## Extended Illustration Summary

## Base Policy Face Amount: $\$ 500,000$ <br> Initial Death Benefit Amount: $\$ 500,000$ <br> Premium Paying Period: 20 years

Premium Mode: Check-O-Matic
Dividend Option: Paid-Up Additions

Like the Illustration Summary on the previous page, the table below shows how your policy may perform on guaranteed, nonguaranteed current, and non-guaranteed mid-point bases. This table is illustrated to show this performance in all policy Years, and assumes that you utilize policy loans and or withdrawals as a living benefit. Details of any such policy loans and/or withdrawals can be seen in the Supplemental Illustration of Cash Flows page of this illustration. For a description of these policy features, please refer to the Narrative Summary.

## End Notes

Please refer to the "Owner Actions Reflected In This Illustration" page for an explanation of the Modified Endowment Contract status of the policy being illustrated.
\& Represents the insured's life expectancy added to the insured's age. See Additional Information section on the Narrative Summary page for more information.
Non-Guaranteed values shown are based on our current illustrative dividend scale and our current OPP expense charge of $12.00 \%$. These values are not guaranteed and are subject to change.
Please refer to the Narrative Summary for Column Heading Definitions.

## Owner Actions Reflected in This Illustration

The following illustrated transactions do not occur automatically. For these transactions to happen, New York Life must receive a request from the policyowner:

| Policy Year | Age | Illustrated Transaction |
| :---: | :--- | :--- | | You can surrender your Paid-Up Additional Death Benefit for its cash value |
| :--- |
| at any time. You should request an inforce illustration at the time you |
| surrender PUAs to see how your policy's illustrated values are affected from |
| that point forward. |
| You can exercise a policy loan whenever you need to access your policy's |
| cash value. It is important to understand that outstanding policy loans |
| accrue interest and reduce the policy's cash value and death benefit. |

*This transaction occurs more than once. This is the first year in which it is illustrated.
This chart does not necessarily reflect all possible illustrated transactions that require action from the policyowner. There may be charges associated with some of the illustrated transactions.

Owner Actions Reflected in This Illustration(cont.)

## Important Information About the Modified Endowment Status of Your Policy

This illustration shows two different cash flow scenarios. One is a "full pay" scenario, which assumes that you pay the Yearly Guaranteed Premium at the beginning of each Year from out-of-pocket funds when it is due, that no policy loans are taken or repaid, and that no withdrawals are taken.

The following pages of this illustration assume a "full pay" scenario:

- Illustration Summary
- Yearly Detail

The second cash flow scenario assumes that you take distributions from the policy at some point in the form of policy loans, or withdrawals. Such distributions may lower your out of pocket cost in some years or provide income to meet a need, but they will result in lower cash value and death benefit and may result in tax consequences to you.*

The following pages of this illustration assume that you take distributions from your policy, and demonstrate the impact on your policy:

- Extended Illustration Summary
- Supplemental Illustration of Cash Flows
- Variable Loan Interest Rate Effect on Policy Performance
- Internal Rate of Return Summary - Year by Year
- Supplemental Life Insurance for Retirement Income Supplemental Illustration

The evaluation of the Modified Endowment Contract (MEC) status of this illustration is based on the assumed premium funding and distributions shown in the Supplemental Illustration of Cash Flows. Based on the scenario shown in the Supplemental Illustration of Cash Flows, this policy will not become a MEC in any year.

It is important for you to know that actual premium payments into, or distributions from your policy that differ from those shown in the Supplemental Illustration of Cash Flows - including those shown in the "full pay" scenario" described above - may result in a different MEC evaluation. For more information about Modified Endowment Contracts please refer to the Narrative Summary, or speak with your tax advisor.

[^7]
# Supplemental Illustration of Cash Flows 

## Base Policy Face Amount: \$500,000 <br> Initial Death Benefit Amount: \$500,000 <br> Premium Paying Period: 20 years

## Premium Mode: Check-O-Matic <br> Dividend Option: Paid-Up Additions

Your Custom Whole Life policy provides more than just valuable death benefit protection. The table below illustrates how you can access your policy's living benefits via loans and/or withdrawals. It is divided into two sections: Policy Cash Flows and Policy Cash Surrender Value and Death Benefit. Policy Cash Flows illustrates money (premium, withdrawals, loans, loan interest, and loan repayments) coming into and out of your policy. The Policy Cash Surrender Value and Death Benefit columns show the resulting effect of the illustrated cash flows.

| Policy Cash Flows |  |  |  |  |  | Policy Cash Surrender Value and Death Benefit |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Reflects non-guaranteed values and benefits which are based on assumptions that are subject to change by the insurer; therefore, actual results may be more or less favorable.
This is a supplemental illustration which is not valid without the attached basic illustration. Refer to the basic illustration for guaranteed values and benefits and other important information.

Please see the End Notes at the end of this ledger for important information.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.

Reflects non-guaranteed values and benefits which are based on assumptions that are subject to change by the insurer; therefore, actual results may be more or less favorable.
This is a supplemental illustration which is not valid without the attached basic illustration. Refer to the basic illustration for guaranteed values and benefits and other important information.

## End Notes

Please refer to the "Owner Actions Reflected In This Illustration" page for an explanation of the Modified Endowment Contract status of the policy being illustrated.
\& Represents the insured's life expectancy added to the insured's age. See Additional Information section on the Narrative Summary page for more information.
Loan interest accrues at a variable rate, which is currently $5.00 \%$, up until the policy anniversary on which the insured reaches age 100 . Thereafter, interest accrues at a fixed rate of $4.00 \%$ per year.
Unless noted above, values shown are based on our current illustrative dividend scale and our current OPP expense charge of $12.00 \%$.
Please refer to the Narrative Summary for Column Heading Definitions.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.

# Variable Loan Interest Rate Effect on Policy Performance 

## Base Policy Face Amount: $\$ 500,000$ <br> Premium Paying Period: 20 years

Premium Mode: Check-O-Matic
Dividend Option: Paid-Up Additions

When you take a policy loan, your policy's cash value and death benefit are impacted by the size of the loan and the loan interest rate. It is important for you to be aware that your policy has a variable loan interest rate that can increase or decrease over time, and that different rates can affect your policy's performance.

The ledger below shows the same withdrawals and policy loans demonstrated in the Supplemental Illustration of Cash Flows under three different loan interest rate scenarios: the current loan interest rate of $5.00 \%$ in all years; a rate of $7.00 \%$ in all years, and a rate of $9.00 \%$ in all years. For each scenario, the resulting policy values after the withdrawal and loan is made are shown in the "Cash Surrender Value" and "Death Benefit" columns. Each scenario assumes the current non-guaranteed dividend scale continues in all years.

While you are not required to repay a policy loan with out-of-pocket funds, doing so restores your policy's benefits and cash value. Please refer to the Narrative Summary pages of this illustration for important information about policy loans.

| Loan Interest Rate of 9.00\% |  |  |  |  | Loan Interest Rate of 7.00\% |  |  | Loan Interest Rate of 5.00\% |  |  |

Reflects non-guaranteed values and benefits which are based on assumptions that are subject to change by the insurer; therefore, actual results may be more or less favorable.
This is a supplemental illustration which is not valid without the attached basic illustration. Refer to the basic illustration for guaranteed values and benefits and other important information.

Please see the End Notes at the end of this ledger for important information.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.

# Variable Loan Interest Rate Effect on Policy Performance (cont.) 

End Notes<br>Please refer to the "Owner Actions Reflected In This Illustration" page for an explanation of the Modified Endowment Contract status of the policy being illustrated.<br>\& Represents the insured's life expectancy added to the insured's age. See Additional Information section on the Narrative Summary page for more information.<br>Loan interest accrues at the variable rates shown in the ledger up until the policy anniversary on which the insured reaches age 100. Thereafter, interest accrues at a fixed rate of $4.00 \%$ per year.<br>Unless noted above, values shown are based on our current illustrative dividend scale and our current OPP expense charge of 12.00\%.<br>Please refer to the Narrative Summary for Column Heading Definitions.

# Internal Rate of Return Summary <br> (Including Year by Year Internal Rates of Return) 

## Base Policy Face Amount: $\$ 500,000$ <br> Initial Death Benefit Amount: \$500,000 <br> Premium Paying Period: 20 years

Premium Mode: Check-O-Matic<br>Dividend Option: Paid-Up Additions

Life insurance policies provide immediate death benefit protection and long term tax deferred cash value accumulation. The Cumulative Internal Rate of Return (IRR) is an important way to measure your Custom Whole Life policy's performance. It is equivalent to the interest rate at which the illustrated Annual Policy Cash Flow would have to be invested outside the policy (ignoring taxes) to arrive at the cash value or death benefit of the policy when non-guaranteed dividends are factored in. The Cumulative IRR is compounded annually.
The Year by Year Internal Rate of Return is the individual return earned within each individual policy year. Each annual return is equivalent to the interest rate at which the cash value at the beginning of the policy year, plus the Policy Cash Flow for that policy year, would have to be invested outside the policy (ignoring taxes) to arrive at the cash value at the end of that policy year.
For both the Cumulative and Year by Year IRR measures, all payments are assumed to be paid at the beginning of each policy year.

|  | Policy Values |  |  |  |  | Internal Rates of Return |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

Reflects non-guaranteed values and benefits which are based on assumptions that are subject to change by the insurer; therefore, actual results may be more or less favorable.
This is a supplemental illustration which is not valid without the attached basic illustration. Refer to the basic illustration for guaranteed values and benefits and other important information.

Please see the End Notes at the end of this ledger for important information.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.

Reflects non-guaranteed values and benefits which are based on assumptions that are subject to change by the insurer; therefore, actual results may be more or less favorable.
This is a supplemental illustration which is not valid without the attached basic illustration. Refer to the basic illustration for guaranteed values and benefits and other important information.

This illustration shows the continuation of the currently illustrated non-guaranteed elements which are not guaranteed and are based on assumptions which are subject to change by the Company. In the future, the actual non-guaranteed elements and results may be more or less favorable than those shown in the illustration. Refer to the "Narrative Summary" page for more information about the factors that may affect policy performance.
Prepared for AGE 2 BOY (Male, 2, Juvenile), AD117
